

KSIVI x-shaped: global variance, seed 44, 50,000 steps

ConditionalGaussianGlobal | width 128 | noise dimension 2 | batch 128 | annealing enabled | initial variance 1.3133

50,000 steps

Columns: 0 to 50,000 updates, every 5,000 (first column: initialization). Orange: variational samples; blue: target contours.
